

ISIS - Feature #1076

Need to build a new hardware based Mac OSX 10.6 (Snow Leopard) for devel

2012-09-04 11:17 AM - Stuart Sides

Status:	Closed	
Priority:	Normal	
Assignee:	Stuart Sides	
Category:	Infrastructure	
Target version:	N/A	
Impact:		Software Version:
Description The current Mac OSX 10.6 Snow Leopard VM is experiencing network slowdown issues and intermittent system lockups. A new 10.6 system without the VM needs to be installed and tested.		

History

#1 - 2012-09-04 11:22 AM - Stuart Sides

IMPACT

The impacted to ISIS is expected to be none. The new hardware based system will use the same libraries as the previous VM based system and will be running the same OS version.

#2 - 2012-09-13 03:14 PM - Stuart Sides

The new Max OSX 10.6 system is running as prog14 and required no changes to ISIS
